ABOUT GREE

Gree Electric Appliances, Inc. of Zhuhai was founded in 1991 and it was listed on the Shenzhen Stock Exchange in November 1996. At the beginning, Gree was only a company that assembled residential air conditioners. Now it has grown into a diversified technological global industrial group that has expanded its business to air conditioners, home appliances, high-end equipment and communication equipment. Gree products are sold widely to more than 200 countries and regions.

2005: Gree has topped No.1 in production and sales volume of residential air conditioners for 15 consecutive years.

2015: Gree's sales revenue exceeded 15.08 billion USD.

2016: Gree's sales revenue exceeded 16.51 billion USD.

2017: Gree's sales revenue exceeded 22.21 billion USD.

2018: Gree entered into the list of Forbes Global 2000 again and ranked No. 294, moving up 70 places compared with the previous year. Gree's sales revenue exceeded 30.23 billion USD.

2019: Gree has ranked the 414th on the list of Fortune Global 500.

Thanks to 300 million users' choices, Gree products are widely sold in more than 200 countries and regions. Today Gree's annual production capacity of RAC and CAC is more than 60 million and 6 million sets respectively.

Action makes the future and innovation makes achievement. Looking forward, Gree will press ahead with its business philosophy of passion, innovation and realization. We aim to build a centenary air conditioning enterprise and create a better life for humankind.

101-108 SCREW CHILLER

- 103 High-efficiency Modular Air-cooled Screw Chiller
- 105 Permanent Magnetic Synchronous Inverter Screw Chillerr

109-120 CENTRIFUGAL CHILLER

- 111 CE Series Centrifugal Chiller
- 115 CVE Series Permanent Magnet Synchronous Inverter Centrifugal Chiller
- 118 CC Series Magnetic Bearing Inverter Centrifugal Chiller

121-132 TERMINAL

- 123 Fan Coil Unit
- 131 Air Curtain

133-140 SPECIALIZED AC

- 135 Marine Air Conditioner

SOME PARTS

**Golden fin condenser**

Anti-corrosive performance of golden fin is 3 times better than normal fin.

**Inner groove copper**

Special thickened inner groove copper tube enhances heat exchanging performance.

**Built-in drain pump**

The drain pump can pump the condensation to a high level. It facilitates condensation draining from the indoor unit and makes the installation of indoor unit easier.

**Washable filter**

Filters are easy to dismantle and install. You can use dirt collector or water to clear away the dust.

**Quality motor**

Quality motor makes operation steady and in low noise.

**Auxiliary electric heater**

Auxiliary heater greatly improves heating capacity and saves energy.

**Slave and master wired controller**

One indoor unit can be connected with two wired controllers to realize controlling of the same indoor unit from different control points.

**Long connection pipe design**

The total length of connection pipe reaches 1000m, which greatly improves the project flexibility of the unit.

COMFORTABLE & HEALTHY

**Vertical swing**

Air discharge flaps can move vertically for efficient air and temperature distribution throughout the room.

**Horizontal swing**

Air discharge louver can move horizontally for efficient air and temperature distribution throughout the room.

**Anti-cold function**

The indoor unit will not blow in the winter if the air is not warm enough.

**Turbo function**

To run with strong power and make you feel comfortable(cool or warm) quickly.

**Fresh air supply ventilation**

The unit can introduce a certain percentage of fresh air to satisfy the fresh air requirement.

**Comfortable sleeping mode**

The setting temperature and the indoor noise can be adjusted to a more comfortable level when you set the "sleeping mode".

**Quiet function**

Unit is ensured to operate with the lowest noise by ultra-low fan speed and auto adjustment according to system parameter.

HIGH EFFICIENCY & ENERGY SAVING

**High efficiency**

The air conditioner is designed to high energy efficiency and to realize power saving.

**Intelligent defrosting**

It performs defrosting intelligently when necessary, thus improving heating efficiency and saving energy.

**Energy saving function**

When this function is activated, the temperature setting is only in limited range, so as to save energy.

**All DC inverter technology**

All motors adopt DC inverter technology, which greatly improves energy efficiency.

CONVENIENCE

**Memory function**

Unit is able to remember the operations before power failure and automatically returns to those operations when power restored.

**Compact design**

Unit is designed with smaller dimension, which is easy to install and transport, and saves the cost.

**Easier maintainability**

The unit is designed to be easier for maintenance and component replacement.

**Auto addressing technology**

The new generation of indoor unit applies auto addressing technology, which greatly reduces project debugging time and error rate.

RELIABILITY

**Auto clean**

After turning off unit, the indoor fan will keep running in low speed for a moment to dry the inner components and parts, in order to prevent mildew and keep users healthy.

**Self-diagnosis**

Malfunction codes are shown on the display panel for fast and easy maintenance when any problem occurs.

**Low voltage startup**

Unit is able to safely start when voltage is below standard.

**Low temperature heating**

Unit is able to start and operate in normal when the ambient temperature is lower than -20°C and heating capacity remains still.

**Modular operating**

Several units can operate together as modules, so that capacity output control is more precise, and also higher reliability.

**Comprehensive protection**

The unit is designed with various of protection functions to ensure the reliability.

VERSATILITY

**High ESP**

The external static pressure range is higher, which ensures longer delivery distance for air to provide powerful cooling.

**Wide voltage range**

The unit can operate in a wide range of voltage, greatly reducing the impact of voltage fluctuation.

**Wide operation range**

Unit can operate in wide range, greatly reducing the ambient temperature limitation.

**Multi fan speed**

The fan can operate with multi speeds and satisfy different air flow volume requirement.

**Modular structure**

High efficiency compressor presents reliable performance.

CONTROLLER

**24 hour timer**

Unit can be set to turn on or turn off at anytime in a day.(The timing interval is 5-minute.)

**Weekly timer**

Unit can be set to start heating or cooling anytime on a daily or weekly basis.

**°C/°F switch**

Under status of unit off, press MODE and "-" buttons simultaneity to switch °C/°F.

**Clock display**

Time is shown on remote controller.

**Child lock**

It avoids child's wrong operation on the remote controller.

**Key-card control**

The key-card control function is specially designed for the hotel rooms. By removing the key-card, the air conditioner can be automatically switched to stand-by status.

**Centralized control**

Starts, stops and regulates the air conditioner from a distance.

**Long-distance monitoring**

Long-distance monitoring enables the unit to be controlled and monitored from a long distance.

**Shield function**

Remote control the indoor unit and shield the functions of wired controller which include ON/OFF, temp or mode setting, energy-saving function, etc.

**Human engineering operation**

Adopts the technologies of auto addressing, non-polar communication and auto debugging, which improves project efficiency.

**Floor Heating Debugging**

LIGHT COMMERCIAL AC

U-Match

Big Duct Type Unit

U-Match

It is a kind of split system that the outdoor unit can be freely connected to different types of indoor units according to various indoor decoration requirements.

Easier maintainability	Energy saving function	Compact design	High efficiency	Intelligent defrosting	Wide operation range	Comfortable sleeping mode	Quiet function

- › Adopt eco-friendly refrigerant R32. GWP of R32 is 68% lower than that of R410A, and charging quantity is reduced by 30% compared to R410A.
- › High energy efficiency. SEER in cooling is up to 7.2, and SCOP in heating is up to 4.0. Power consumption in standby status is only 1W.
- › Wide operation range. Cooling operation range is from -20 °C (DB)~48 °C (DB), and heating operation range is from -20 °C (DB)~24 °C (DB).
- › Smart control including APP control, long-distance control and centralized control.

Indoor Unit CE

- ### Duct type
- › DC motor, energy-saving and high efficiency.
 - › Fresh air unit can be connected.
 - › Lift of water pump is 1000mm.
 - › Energy efficiency can be up to A++ in cooling season and A+ in heating season.
- ### Floor ceiling type
- › DC motor, energy-saving and high efficiency.
 - › Fresh air unit can be connected.
 - › Lift of water pump is 1000mm.
 - › Energy efficiency can be up to A++ in cooling season and A+ in heating season.

- ### Cassette type
- › 360° air discharge for balance room temperature.
 - › DC motor and DC water pump, energy-saving and high efficiency.
 - › Fresh air unit can be connected.
 - › Lift of water pump is 1000mm.
 - › Energy efficiency can be up to A++ in cooling season and A+ in heating season.
- ### Wall-mounted
- › DC motor, energy-saving and high-efficiency.
 - › Energy efficiency can be up to A++ in cooling season and A+ in heating season.

Control System Lineup

Controlling system	Product series		High efficiency series		
	Product series	Image	Duct type	Cassette type	Floor ceiling type
					
Wireless remote controller	YAP1F6				
	YAN1F1				
	YAA1FB6(WiFi)				
Wired controller	XK117				
	XE70-13/G2				
	XE71-42/G				
Central controller	CE52-24/F(C)				
Modbus gateway	ME50-00/EG(M)				
Dry contact gateway (Extended function board)	ME30-42/E1				
Optoelectronic isolated converter	RS232-RS422/485				
WiFi module*	ME31-00/C6 ME31-00/C4				
Door controller	MK03				
Debugger	CE42-24/F(C)				

Note : ● means standard, ○ means optional.

*Please confirm the final specifications with sales representatives.

Big Duct Type Unit

Inverter Series(High Capacity)

It is a kind of split system that can be connected with air duct to realize cooling/heating in subdivided area.

*: If the capacity of outdoor unit is 40kW, two outdoor units are needed for the operation of one indoor unit.

Intelligent defrosting

Compact design

Comprehensive protection

Easier maintainability

Self-diagnosis

- › All DC inverter for high efficiency and energy saving.
- › High static units for longer ducted runs.
- › ESP is up to 250Pa.
- › Static pressure is adjustable.
- › Intelligent filter cleaning reminding function.
- › Indoor fan can be adjusted according to the static pressure of air duct installed by customers.

GMV5

Gree GMV5 All DC Inverter VRF adopts high-efficient DC inverter compressor and DC inverter fan motor. The unit can be combined modularly from 8HP to 88HP. Maximum capacity can up to 246kW.

- » Outdoor unit quiet mode.
- » High energy efficiency with high-performance compressor; Long connection pipe design with the maximum length of 1000m.
- » Auto switch of module status in every 8hrs, which greatly improves the reliability of complete unit.
- » 4 levels of static pressure for option with the maximum of 82Pa.

Max. piping length (meter)	GMV5 Mini	GMV5 Slim	GMV5E
Total piping length	250m ¹	300m ²	1000m
Actual piping length	100m ¹	120m ²	165m
Equivalent piping length	120m ¹	150m ²	190m
Height difference between indoor units	10m ¹	15m ²	30m
Height difference between ODU and IDU (ODU is located above the IDU)	30m ¹	50m ²	90m
Height difference between ODU and IDU (IDU is located above the ODU)	30m ¹	40m ²	90m
Piping length from first indoor branch to the farthest IDU	40m ¹	40m ²	40m

Notes:
 *1: The value is applied to product type with 8kW, 10kW or 12.1kW.
 *2: The value is applied to product type with 12kW, 14kW or 16kW.

Note:

1. The unit GMV-280WM/E1-X or GMV-280WM/E-X can be replaced by each other.
2. The unit GMV-450WM/E1-X or GMV-450WM/E-X can be replaced by each other.
3. The combination models of the outdoor units are not Eurovent certified.

GMV5 Home

GMV5 Home is a new generation of multi VRF system developed by Gree, integrating "central air conditioning + hot water + floor heating".

Outdoor Unit

Water Tank

SXTD200LC JW/A-K*2

Hydro Box

Hot water converter*1

Golden fin condenser

Inner groove copper

Compact design

High efficiency

Wide voltage range

Easier maintainability

» High efficiency and energy savings. The self-developed DC inverter technology stimulates the intelligence and integration of the system. In full heat recovery mode of "cooling + hot water", the ECOP is up to 7.0; DC inverter water pump is adopted, which has apparent advantages in energy savings, flow-lift regulating range and performance curve.

» Optional quiet modes. The system has got night quiet mode and forced quiet mode, with operation noise as low as 45dB(A).

» Unique comfort functions. The system has got auto heat recovery function in cooling; the heat is recovered automatically for heating water; water heating and floor heating can be available simultaneously; 3D heat supply provides more comfort; the optimized defrosting reduces the fluctuation of indoor temperature.

Item	Nominal operating condition(temperature)					
	Outdoor condition		Indoor condition		Water	
	DB(°C)	WB(°C)	DB(°C)	WB(°C)	Start(°C)	End(°C)
Cooling	35	24	27	19	/	/
Heating	7	6	20	15	/	/
Hot water	20	15	/	/	15	55

Operation range	Mode		Outdoor condition(°C)
	Cooling		-5~50
	Heating		-15~24
	Water heating		-15~43
	Cooling and water heating		-5~43
Heating and water heating		-15~24	

Hydro Box

Model		NRQD16G/A-S		
Heating capacity		kW	4.5(3.6-16)

Loading quantity		40'GP/40'HQ	unit	1058/1196

Hot Water Converter

Model		NRZ16G/A-S		
Heating capacity		kW	4.5(2.8~5.6)	
Dimension (W×D×H)	Outline	mm	370×135×485	
	Package	mm	473×238×660	
Power supply		V/Ph/Hz	220-240V ~ 50/60Hz	
Connecting pipe	to ODU	Gas	mm	Φ15.9
		Liquid	mm	Φ9.52
		Gas(high pressure)	mm	Φ12.7
	to water tank	mm	Φ25	
Net weight/Gross weight		kg	8.5/13.5	
Loading quantity		40'GP/40'HQ	unit	660/880

Water Tank

Model		SXTD200LCJW/A-K	
Capacity	L	185	
Power supply for electric heater	-	220-240V~50Hz	
Input power for electric heater	W	1500	
Max. operation pressure	Mpa	0.70	
Outline dimensions(W×D×H)	mm	462×462×1944	
Package dimensions(W×D×H)	mm	583×583×2045	
Water tank gross/net weight	kg	88/75	
Outer size of connection pipe	mm	Φ6, Φ9.52	
Material of inner tank	-	Enamel	
Made of defending cauterization	-	Mg anode	

Note:

*1: The hot water converter is only matched with the outdoor unit model of GMV-S(120~160)WL/A-S.

*2: The hot water converter is only matched with the water tank model of SXTD200LCJW/A-K.

*3: Please consult the sales person for the water tank.

GMV6

DC Inverter Multi VRF Unit (R410A, Inverter)

GMV6 heat pump multi VRF unit adopts air-makeup enthalpy-adding compressor, brand new heat exchanger and system control proposal. Seasonal energy efficiency of the whole is greatly improved, with SEER and SCOP improved by up to 20% and 30% respectively.

Energy saving function	High efficiency	Easier maintainability	Wide operation range	Golden fin condenser	Centralized control	Long-distance monitoring
Inner groove copper	Long connection pipe design	Intelligent defrosting	Turbo function	Modular operating	Comprehensive protection	All DC inverter technology
High ESP	Quality motor	Multi fan speed	Modular structure	Wide voltage range	Auto addressing technology	

- » Air-makeup enthalpy-adding compressor design is applied for stronger cooling and heating performance and wider operation range from -30°C~55°C;
- » Brand new heat exchanger design and system control proposal greatly improves the operation energy efficiency of the whole year, with SEER and SCOP improved by up to 20% and 30% respectively;
- » Engineering design is more flexible. The external static pressure is improved by 35%, reaching 110Pa. Maximum connectable indoor unit quantity of single system is improved by 25%, reaching 80 sets (It needs engineering custom if there are more than 80 indoor units and the engineering custom is available for 100 indoor units at the most);
- » With compact unit body design, new generation 12HP model saves floor area by 29% compared with the last generation model;
- » New refrigerant and refrigeration oil circular design, and air-makeup enthalpy-adding circulation are adopted for better performances in high-temperature cooling and low-temperature heating and more reliable operation.

GMV6 HR*

GMV 6 HR Series integrates multiple functions of cooling, heating, water heating, floor heating and heat supply, featuring powerful functions and convenient operation. It adopts DC inverter enthalpy-adding compressor and brand new high-efficiency heat exchanger, to achieve -25°C ultra-low ambient temperature heating, continuous heating and other functions for more energy savings and higher energy efficiency.

Continuous heating	Energy saving function	High efficiency	Easier maintainability	Golden fin condenser	Centralized control	Long-distance monitoring	Comprehensive protection
Inner groove copper	Long connection pipe design	Intelligent defrosting	Turbo function	Low temperature heating	Quiet function	Modular operating	Wide operation range

- » The indoor unit can perform cooling and heating simultaneously, as well as water heating and floor heating functions;
- » -25°C ultra-low ambient temperature heating can be achieved;
- » Low power standby function can be achieved for more energy savings;
- » Outdoor unit capacity ranges from 8HP to 22HP with maximum combination capacity of 88HP, meeting various engineering demands;
- » One unit with multiple functions of cooling, heating, water heating, floor heating and heat supply, meeting various demands of the customers;
- » Continuous heating function is available to further improve the comfort and energy efficiency of the unit;
- » High-efficiency enthalpy-adding DC inverter compressor and high-efficiency DC motor are adopted. Energy efficiency reaches 8.5 under heat recovery status;
- » Strong low-temperature injection technology and integrated aluminum electric control and high-efficiency radiation design are adopted, achieving operation in wide ambient temperature range from -25°C ~ 55°C ;
- » Outdoor static pressure is up to 110Pa, reducing engineering application requirement and making equipment floor design more convenient;
- » It can match with the new generation mode exchange. The compact structure design reduces the size by 20% in maximum. Meanwhile, pipe port design with flexible diameters is adopted for more convenient installation.

GMV5 HR

Heat Recovery Series

GMV5 Heat Recovery System embodies the excellent features of GMV5(DC inverter technology, DC fan linkage control, precise control of capacity output, balancing control of refrigerant, original oil balancing technology with high pressure chamber, high-efficiency output control, low-temperature operation control technology, super heating technology, high adaptability for project, environmental refrigerant). Its energy efficiency is improved by 78% compared with conventional multi VRF.

Golden fin condenser	Inner groove copper	High efficiency	Intelligent defrosting	Long-distance monitoring	Quiet function	Modular operating*	Comprehensive protection	Wide voltage range
Compact design	Easier maintainability	Centralized control	Wide operation range					

- » All DC Inverter Technology. All DC inverter compressor is used in this system. It can directly intake gas to reduce loss of overheat and improve efficiency.
- » 82 Pa Wide Application Location.
- » Advanced Control Functions.
- » Better Reliability.
- » Wide Operation Range: Cooling: -5°C~52°C; Heating: -20°C~24°C; Cooling and heating: -10°C~20°C.
- » Flexible Piping Design.

Fresh Air Ventilation Kit

Model			XF150A-T*
Fresh Air Intake Volume		%	10
Dimension (W×D×H)	Outline	mm	834×834×60
	Package	mm	873×873×180
Dimension of the connrction		mm	150
		Pcs	2
Net weight/Gross weight		kg	2.7/7.7

*This model can be matched with 360°Air Discharge Cassette Indoor Units of GMV-ND**T/C-T series only.

360° Air Discharge Compact Cassette Indoor Unit (50/60Hz)

Note:

- Rated cooling capacity test conditions: indoor 35°C DB/28°C WB, outdoor 35°C DB; connection pipe length: 7.5m, without height drop between units. The default air outlet temperature of the unit is 18°C.
- Rated heating capacity test conditions: *1: indoor 7°C DB, outdoor 7°C DB/6°C WB, *2: indoor -7°C DB, outdoor 0°C DB / -2.9°C WB; connection pipe length: 7.5m, without height drop between units. The default air outlet temperature of the unit is 22°C.
- Input power: the left side of "/" is the rated power while the right side is the maximum power;
- External static pressure: the left side of "/" is the static pressure of a standard unit while the right side is the static pressure option of a non-standard unit;
- Air volume: the left side of "/" is the rated air volume while the right side is the adjustable fresh air volume.
- Input current: the left side of "/" is the rated current while the right side is the maximum current.
- As to noise: the left side of "/" is the noise value under rated static pressure while the right side is the noise range with the change of static pressure.

Energy Recovery Ventilation(ERV)

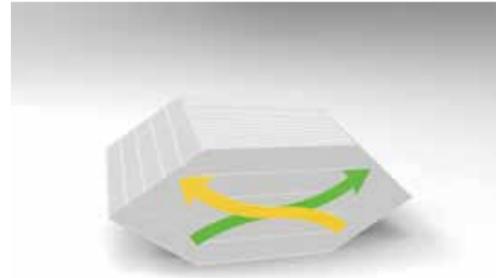

Gree Energy Recovery Ventilation System is designed especially for providing healthy and fresh indoor air, constant air volume and comfortable temperature and humidity with less power consumption. With F7-grade filter, it can effectively remove PM10, PM2.5 and other particles in the air;

Through the total heat exchange core that is made of high-polymer material, the air led from the outside will have efficient heat exchange with the discharged air. Heat exchange efficiency is up to 80%. It is applicable to houses, villas, banks, office buildings and other places with fresh air demand.

Adopts Hexahedral Total Heat Exchange Core

> It adopts hexahedral total heat exchange core, which provides reverse ventilation passage for fresh air and discharged air while preventing the mixture of fresh air and discharged air. Temperature exchange efficiency is 80% at most.

Air Volume Multi-selection Control

> 5 selections of air volume are available. Each selection differs obviously from another. It can satisfy different fresh air requirements under different housing areas and different pipe dimensions.

350 m ³ /h	High
300 m ³ /h	Medium high
250 m ³ /h	Medium
200 m ³ /h	Medium low
150 m ³ /h	Low

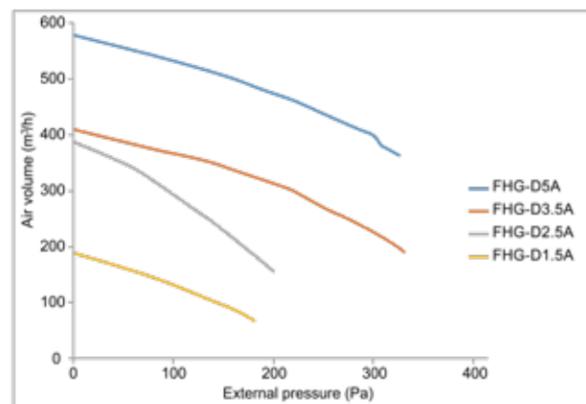

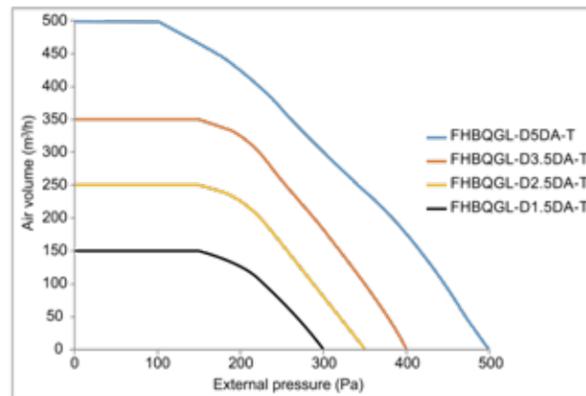

Note: The above air volume data is tested base on model FHBQGL-D3.5DA-T.

Constant Fresh Air Volume

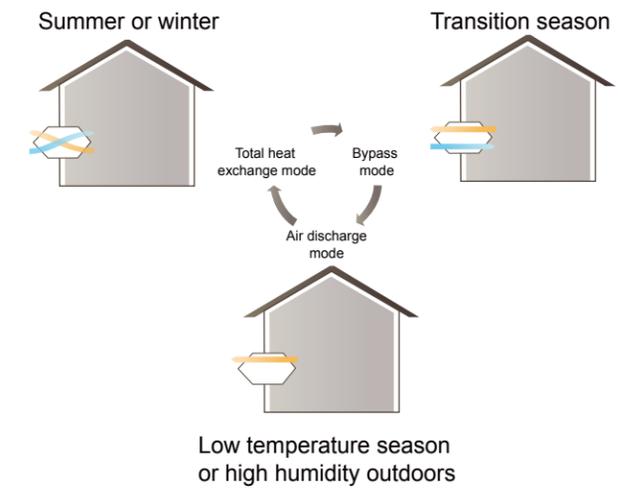

> System adopts DC motor and constant air volume control to realize air provision that will not be attenuated under certain range of static pressure. It can maintain sufficient supply of fresh air during operation, providing users with super comfortable experience.

> The right diagram shows the air volume/static pressure curve of common AC motor. We can see that as the static pressure increases (filter gets more dirty), the volume of fresh air is attenuated correspondingly. As the operation goes on and on, fresh air volume may not be able to satisfy the design requirement.

Comfortable Temperature and Humidity

> Temperature and humidity change a lot in different seasons. The system can automatically switch into bypass mode, air discharge mode, or total heat exchange mode during operation based on the detected temperature and humidity both indoors and outdoors, so you will enjoy comfortable air supply regardless of the seasons.

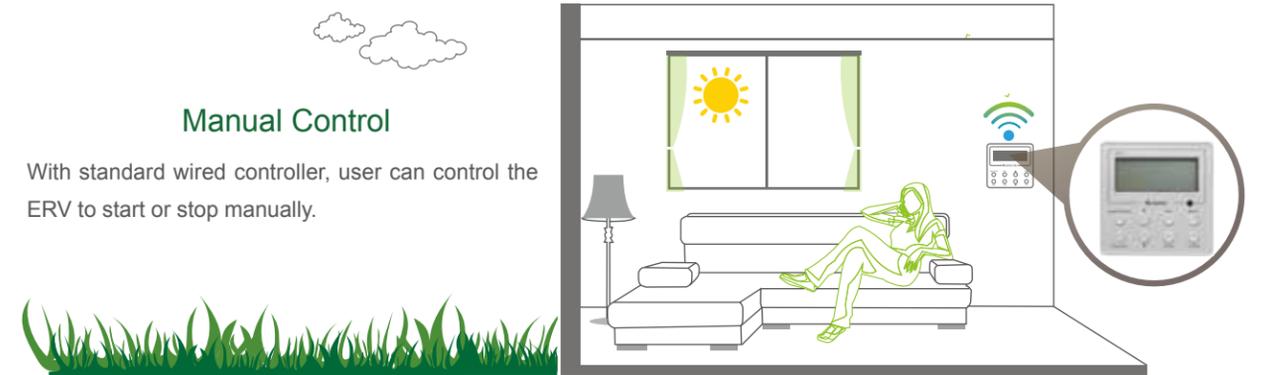

Intelligent Control

> System has manual control, linked control and auto control functions. When you connect the ERV with Multi VRF units, it can realize linked control; when you connect the ERV with air quality detection module, it can realize auto control function.

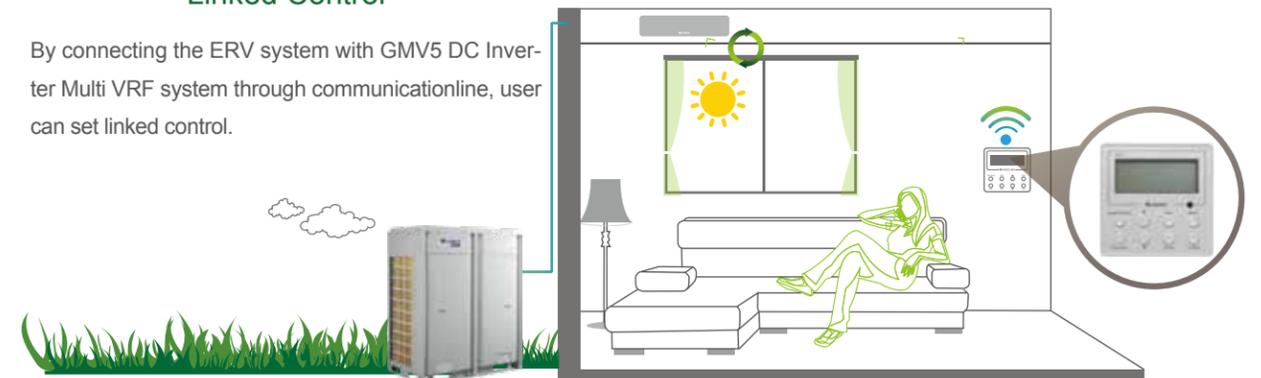

Manual Control

With standard wired controller, user can control the ERV to start or stop manually.

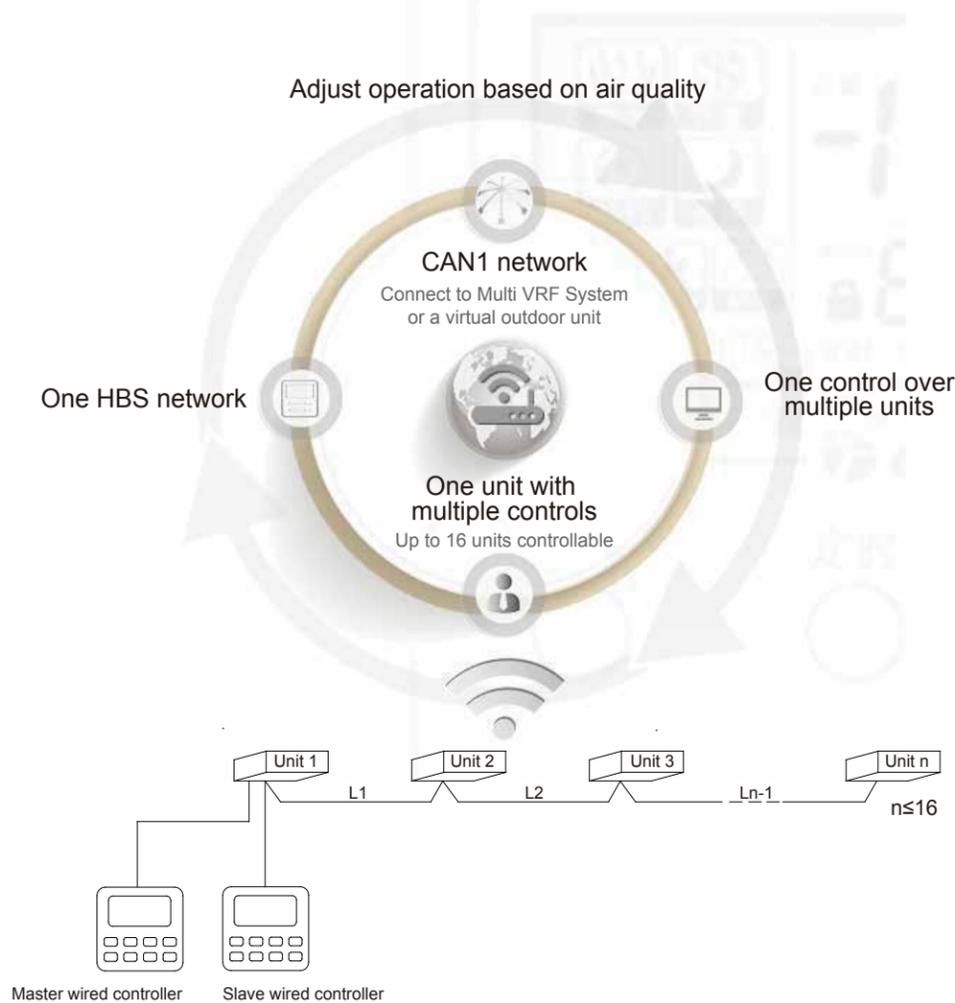

Linked Control

By connecting the ERV system with GMV5 DC Inverter Multi VRF system through communicationline, user can set linked control.

“One Unit With Multiple Controls” and “One Control Over Multiple Units”

> System can be connected with two wired controllers, i.e. master controller and slave controller. Both of them can control the system at the same time. When the Multi VRF System or a virtual outdoor unit is connected, one HBS network can control up to 16 units.

Smart Structural Design

The maintenance window adopts clasp design and hinge design, which is convenient for the maintenance of filter, total heat exchange core and the motor. The thickness of the device is only 220/240mm. It occupies less ceiling space, which is convenient for ceiling installation.

ERV+DX COIL

This series are fresh air units with evaporators, which means they have total heat exchangers and evaporators. When it's used with outdoor units, they can deliver fresh air without increasing the indoor load. They have multiple operation modes and are widely applicable.

Memory function

°C/°F switch

Child lock

Easier maintainability

Weekly timer

Centralized control

- › High-efficiency HR module: They are built with heat exchange chips for efficient energy recovery on the air discharge side. When they are in use, other air conditioning equipment will consume less power.
- › Constant air volume: Units adopt constant air volume control technology so that they can maintain constant air volume within a specific range of pipeline resistance.
- › Free cooling: When outdoor temperature is lower than the set temperature, units can automatically introduce the fresh outdoor air to make the room cooler.
- › Multiple air supply modes: Positive pressure air supply: Different air flow volume can be set for the fresh air side and air discharge side to keep the indoor side under minor positive pressure, which will help guarantee room cleanliness; Negative pressure air supply: Different air flow volume can be set for the fresh air side and air discharge side to keep the indoor side under minor negative pressure, which will help prevent leakage of indoor pollutants. Balanced air supply: The fresh air side and air discharge side can be set with the same air flow volume (default).
- › Linked control: Units can be connected to other indoor units in the same CAN and HBS networks for linked control.
- › Cooling and heating functions: With fan coils, they have cooling and heating functions like common air conditioners.
- › Multiple operation modes: Total heat exchange mode: The fresh air side and air discharge side can have heat exchange for efficient energy recovery. By-pass mode: Ventilation without heat exchange. Air discharge mode: Only air discharge side is turned on for ventilation.

Note*: Gree reserves the right to modify the specifications without prior notice. Please confirm the final specifications with sales representative.

R32

It's a kind of integrated DC inverter unit that comprises cooling, heating and water heating functions, and up to 5.0 energy efficiency. It adopts R32 refrigerant and two-stage compressor. For heating, ambient temperature range is -25~35 °C while the leaving water temperature range is 25~60 °C.

» Floor debugging function;

» Integrated structure, simple installation, less installation cost; R32 refrigerant, low GWP;

» Adopt two-stage compressor to widen the ambient temperature range for heating;

» Leaving water temperature up to 60 °C, applicable to various heating terminals.

Item	Water side	Heat source/User side

» Heating conditions.
Outdoor air temperature 7°C DB/6°C WB.
Entering water temperature 30°C.
Leaving water temperature 35°C.
Standing piping length 5m.

2.Capacities and power inputs are based on the following conditions:

» Cooling conditions.
Outdoor air temperature 35°C DB/- WB.
Entering water temperature 12°C.
Leaving water temperature 7°C.

» Heating conditions.
Outdoor air temperature 7°C DB/6°C WB.
Entering water temperature 40°C.
Leaving water temperature 45°C.
Standing piping length 5m.

Versati III (Monobloc Type)

It's a kind of integrated DC inverter unit that comprises cooling, heating and water heating functions, and up to 5.0 energy efficiency. It adopts R32 refrigerant and two-stage compressor, For heating, ambient temperature range is -25~35 °C while the leaving water temperature range is 25~60 °C.

- » Floor debugging function;
- » Integrated structure, simple installation, less installation cost;
- » R32 refrigerant, low GWP;
- » Adopt two-stage compressor to widen the ambient temperature range for heating;
- » Leaving water temperature up to 60 °C, applicable to various heating terminals.

Item	Water side	Heat source/User side
	Leaving water temperature(°C)	Environment dry bulb temperature(°C)
Cooling	7~25	10~48
Heating	25~60	-25~35
Water heating	40~80	-25~45

Note:

*1: This product series is under development. Please confirm the final specifications with our sales representatives.

Notes:

1.Capacities and power inputs are based on the following conditions:

» Cooling conditions.
Outdoor air temperature 35°C DB/- WB.
Entering water temperature 23°C.
Leaving water temperature 18°C.

» Heating conditions.
Outdoor air temperature 7°C DB/6°C WB.
Entering water temperature 30°C.
Leaving water temperature 35°C.
Standing piping length 5m.

3.For floor cooling.

4.For floor heating.

5.For fan coil unit.

6.For fan coil or radiator.

2.Capacities and power inputs are based on the following conditions:

» Cooling conditions.
Outdoor air temperature 35°C DB/- WB.
Entering water temperature 12°C.
Leaving water temperature 7°C.

» Heating conditions.
Outdoor air temperature 7°C DB/6°C WB.
Entering water temperature 40°C.
Leaving water temperature 45°C.
Standing piping length 5m.

Versati II + (Split Type)

R410A

It is a kind of DC inverter multifunctional air to water heat pumps that could not only supply domestic hot water, but also realize cooling or heating for residential use.

- » Twin rotary DC inverter compressor creates comfortable living circumstance and saves energy.
- » The electronic expansion valve guarantees that the system made adjustments automatically according to the changes of the circumstance and water temperature.
- » Smart dual-temperature detection control technology.
- » The disinfection function at a high temperature up to 70 °C can prevent the growth of bacteria and ensure sanitary water, creating a wholesome life for users.
- » Isolation of water and electricity ensures safe operation.
- » Dual-coil design makes it convenient to join solar panel or boiler.
- » Five-mode operation: heating, cooling, water heating, heating and water heating, cooling and water heating.
- » The unit will periodically increase or decrease water temperature in debugging process, to improve floor adaptability for temperature change.

Item	Water side	Heat source/User side
	Leaving water temperature(°C)	Environment dry bulb temperature(°C)
Cooling	7~25	10~48
Heating	25~60	-20~35
Water heating	40~80(Water tank temperature)	-20~45

Note: When operating conditions are out of the range listed above, please contact Gree.

Versati II

Versati II water heater can perform cooling, heating, water heating, cooling+water heating, and heating+water heating. It can be connected to radiator, floor or fan coil for heat radiation.

Auxiliary electric heater

Golden fin condenser

Quiet function

Intelligent defrosting

Energy saving function

High efficiency

Easier maintainability

Compact design

Low voltage startup

Item	Water side	Heat source/User side
	Leaving water temperature(°C)	Environment dry bulb temperature(°C)
Cooling	7~25	10~48
Heating	25~55	-20~35
Water heating	40~80(Water tank temperature)	-20~45

Note: When operating conditions are out of the range listed above, please contact Gree.

» This unit is very powerful, smart and user-friendly, featuring various functions including holiday mode, absence mode, quiet mode, quiet preset, clock timer, weekly timer, holiday exclusion, floor setting, environment dependency mode, etc. .

» Cooling performance satisfies EU ERP energy efficiency, with a rating up to A++. Motor and water pump elements conform to the requirements set out by the EU Eco Directive.

» It can perform cooling, heating, water heating, cooling+water heating, and heating+water heating, and can be connected to radiator, floor or fan coil for heat radiation.

Split Type Water Heater

Gree split type water heater offers you with sufficient hot water, ensuring a warm and comfortable life to each family. Its installation is convenient and it is applicable for a family of 3 to 5 members.

» Safe and eco-friendly

Water and electricity are separated to avoid possible electric shock. Without possible toxicities of CO, user's safety can be ensured. No pollutant is released during operation, so there is no damage to the environment.

» Reliable and durable

Adopting special compressor, the unit is resistant to high temperature and pressure. The entire unit is with multiple protection functions to ensure long lifespan of the system.

» Easy installation

Without limitation of environment, the unit can be installed in garage, stock room or basement.

» Easy operation

Water temperature can be set. Unit can be on or off depending on water temperature and water consumption. Unit on/off can be set by user according to requirements (the unit will stop once water temperature reaches the setting point). Running of unit in electric platykurtosis is possible to reduce electricity fee.

» Intelligent defrosting

The unit with anti-freezing and intelligent defrosting functions can efficiently prevent freezing and frosting.

» All-day use

The unit can make and supply hot water all day in despite of night, cloudy or rainy days.

Outdoor Unit

Model		GRS-S3.5PdG/NaA1-K	
Rated heating capacity ⁽¹⁾	W	3500(1800~3700)	
Rated input power ⁽¹⁾	W	833(360~910)	
Load profile	-	L	
COP _{DHW} ⁽²⁾	W/W	3.1	
Energy efficiency class ⁽²⁾	-	A+	
Water heating energy efficiency ⁽²⁾	-	130%	
Heating time (7/6 °C, 15-55°C)	h	5.40	
Maximum input power	W	2000+1500W (Electric heater)	
Circuit breaker	A	16	
Water temperature setting	°C	35°C~55°C	
Power supply	V/Ph/Hz	220-240V~ 50Hz	
Protection of ingress ion	-	I PX4	
Refrigerant	Type	R410A	
	Charge	kg	1.40
Outline dimensions	W×D×H	mm	842×320×591
Package dimensions	W×D×H	mm	948×363×660
Max. pipe length/Height		m	20
Gross/Net weight		kg	44.5/38.5
Sound power level ⁽³⁾		dB(A)	63
Operating range		°C	-25~45°C

Notes:

- Value obtained with the following conditions: Outdoor temperature: 20°C DB/15°C WB; Water tank temperature (start/end): 15°C /55°C.
- Value obtained with an air temperature of 7°C and a water inlet at 10°C, as per EN16147-2017, (EU) No 814/2013.
- Value obtained as per EN 12102-2008.
- Gree reserves the right to modify the specifications without prior notice. Please confirm the final specifications with sales representatives.

Water Tank

Model		SXTD200LCJW/A-K	
Capacity	L	185	
Power supply for electric heater	-	220-240V~50Hz	
Input power for electric heater	W	1500	
Max. operation pressure	Mpa	0.70	
Outline dimensions(W×D×H)	mm	462×462×2000	
Package dimensions(W×D×H)	mm	2108×583×565	
Water tank gross/net weight	kg	83/72.5	
Outer size of connection pipe	mm	Φ6, Φ9.52	
Material of inner tank	-	Enamel	
Made of defending cauterization	-	Mg anode	

Note: Gree reserves the right to modify the specifications without prior notice. Please confirm the final specifications with sales representatives.

Inverter Ultra

It's a kind of integrated DC inverter unit that comprises cooling, heating and Hot water functions, and up to 4.6 energy efficiency. It adopts R32 refrigerant and two-stage compressor. For heating, ambient temperature range is -30~35°C while the leaving water temperature range is 25~60°C.

- » Floor debugging function;
- » Integrated structure, simple installation, less installation cost;
- » R32 refrigerant, low GWP;
- » Adopt two-stage compressor to widen the ambient temperature range for heating;
- » Leaving water temperature up to 60, applicable to various heating terminals.

Item	Heat source/User side	Water side
	Environment dry bulb temperature(°C)	Water tank temperature/ Leaving water temperature(°C)
Hot water	-30 ~ 45	30 ~ 60
Heating	-30 ~ 35	25 ~ 60
Cooling	-10 ~ 48	5 ~ 25

Model		GRS-Cm18PdRe/NhA-M

Net weight/Gross weight	kg	190/205	
Loading quantity	40'GP	unit	33
	40'HQ	unit	33

Notes:

1.Capacities and power inputs are based on the following conditions:

» Cooling conditions.

Outdoor air temperature 35°C DB/- WB.

Entering water temperature 23°C.

Leaving water temperature 18°C.

» Heating conditions.

Outdoor air temperature 7°C DB/6°C WB.

Entering water temperature 30°C.

Leaving water temperature 35°C.

2.Capacities and power inputs are based on the following conditions:

» Cooling conditions.

Outdoor air temperature 35°C DB/- WB.

Entering water temperature 12°C.

Leaving water temperature 7°C.

» Heating conditions.

Outdoor air temperature 7°C DB/6°C WB.

Entering water temperature 40°C.

Leaving water temperature 45°C.

3.For floor cooling.

4.For floor heating.

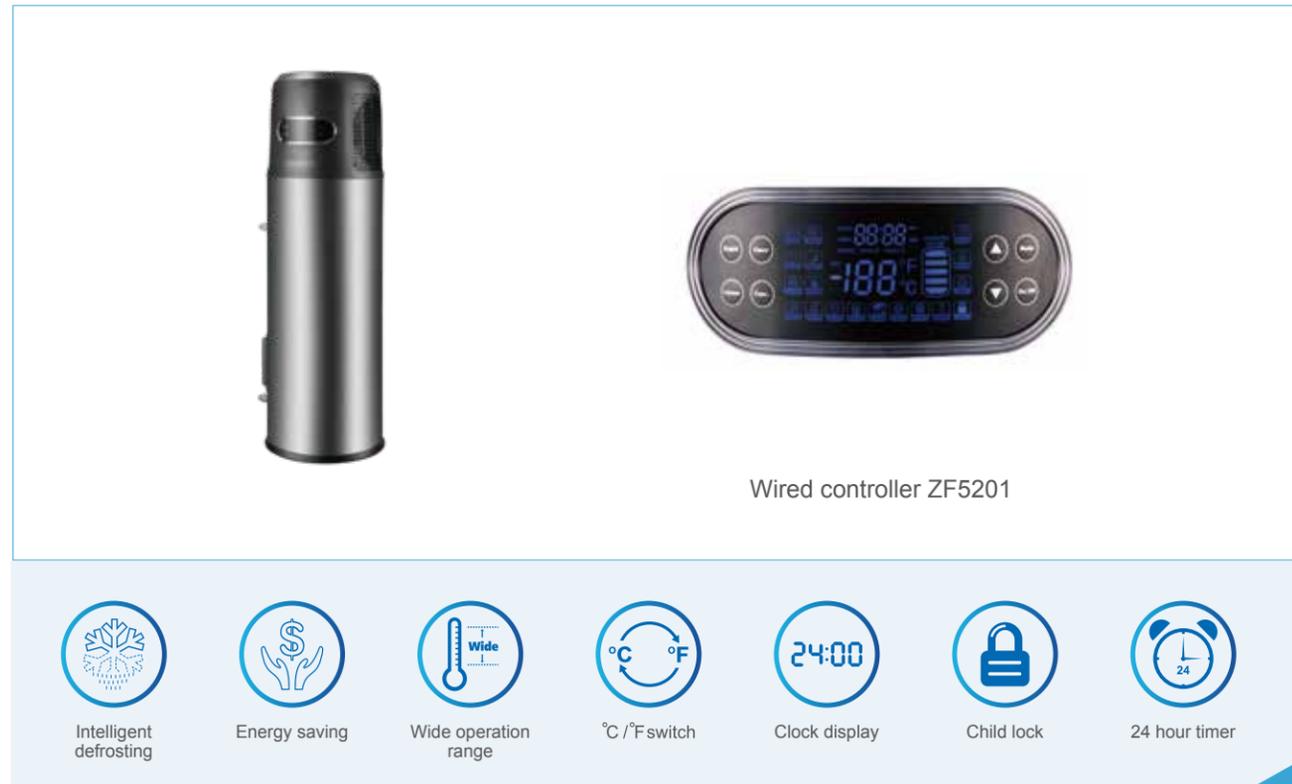

5.For fan coil unit.

6.For fan coil or radiator.

Integral Type Water Heater

The unit adopts integrated design of outdoor unit and water tank, with beautiful appearance, small size, high-end intelligence and easy installation. It is suitable for household usage.

Intelligent defrosting

Energy saving

Wide operation range

°C / °F switch

Clock display

Child lock

24 hour timer

» Safe and eco-friendly

Water and electricity are separated to avoid possible electric shock. Without possible toxicities of CO, user's safety can be ensured. No pollutant is released during operation, so there is no damage to the environment.

» Reliable and durable

Adopting special compressor, the unit is resistant to high temperature and pressure. The entire unit is with multiple protection functions to ensure long lifespan of the system.

» Easy installation

Without limitation of environment, the unit can be installed in garage, stock room or basement. Installation and maintenance is convenient for its no refrigeration system installation.

» Easy operation

Water temperature can be set. Unit can be on or off depending on water temperature and water consumption. Unit on/off can be set by user according to requirements (the unit will stop once water temperature reaches the setting point). Running of unit in electric platykurtosis is possible to reduce electricity fee.

» Intelligent defrosting

The unit with anti-freezing and intelligent defrosting functions can efficiently prevent freezing and frosting.

» All-day use

The unit can make and supply hot water all day in despite of night, cloudy or rainy days.

AIR- COOLED CHILLER

Inverter Mini Chiller
(Heat Pump, R410A Series)

Inverter Modular Air-cooled Chiller
(Heat Pump, R32)

Inverter Modular Air-cooled Chiller
(Heat Pump)

Inverter Mini Chiller (Heat Pump, R410 Series)

Inverter mini chiller, is a kind of small-size air-cooled chiller that can be connected to all sorts of fan coil units to realize cooling and heating. It can be used in the temperature range of -20~48℃.

Inner groove copper

Self-diagnosis

Comprehensive protection

Memory function

- » Compressor inverter control regulates water temperature precisely.
- » Integral installation is convenient and cost-saving.
- » Precise system pressure control improves the anti-freezing function of the system.
- » Two-stage compression technology is adopted to greatly improve the system's performance.

Inverter Modular Air-cooled Chiller (Heat Pump, R32)

All DC inverter, high efficiency and energy conservation, wide operation range, compact size and modular combination.

- » All DC inverter compressor and fan, high-efficiency and energy-saving;
- » Super quiet and wide operation range;
- » Convenient installation, modular combination and smart control;
- » With water pump switchover function, for prolonging service life of water pump;
- » Remote ON/OFF by one button, convenient for operation.

Inverter Modular Air-cooled Chiller (Heat Pump)

A Series Inverter Modular Air-cooled Chiller adopts all DC inverter and has wide operational range, compact design and can be modularized.

- » High-efficiency and energy-saving, with all DC inverter compressor and fan;
- » Quiet and wide operational range;
- » Easy installation, modularized combination, intelligent control;
- » With water pump switch function for prolonging service life of water pump;
- » Long-distance one-key ON/OFF control.

SCREW CHILLER

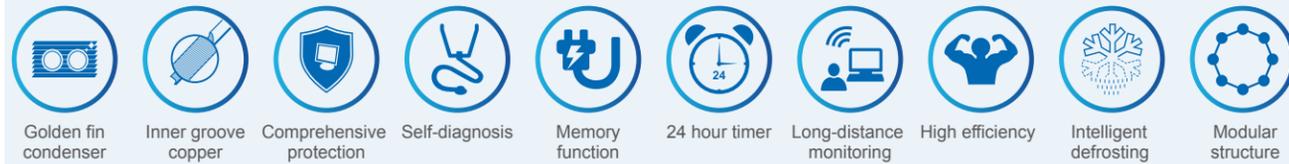

High-efficiency Modular Air
-cooled Screw Chiller

Permanent Magnetic Synchronous
Inverter Screw Chiller

High-efficiency Modular Air-cooled Screw Chiller

R134a

It is a kind of high-efficiency air-cooled screw chillers that can be connected to all sorts of fan coil units to realize cooling/heating for civil or industrial buildings.

- » Thanks to V type fin structure, unit features small refrigerant pressure loss and high efficiency.
- » With flooded type shell-and-tube design, evaporating temperature is increased, hence improving the heat exchanging efficiency and energy efficiency.
- » Unit adopts low noise fan blades and specialized compressor noise reduction device, therefore sound level falls to 5dB(A) lower than the 2nd generation.
- » Due to the totally-enclosed design, its appearance is harmonious and nice-looking.

Permanent Magnetic Synchronous Inverter Screw Chiller

LHVE Series

Gree LHVE Series Permanent Magnetic Synchronous Inverter Screw Chiller (R134a) is specially designed to improve efficiency and reduce operation cost. Adopting the advanced semi-closed permanent magnetic synchronous inverter screw compressor, the latest efficient falling film heat exchanger and the eco-friendly refrigerant R134a, the product is energy-saving with high reliability, ensuring long-term stable operation, which is energy-efficient. Cooling capacity range under nominal condition is 120 ~ 600RT. It is widely applied to all kinds of office buildings, hospitals, schools and malls, besides, it can be adopted in cooling occasions of technological process.

- » Adjust the load with rotate speed to realize consecutive adjustment of 20%-100% of one single compressor load;
- » The consecutive adjustment structure of discharge volume can adjust the discharge volume according to actual operation condition, realizing consistent internal and external pressure ratio, heat insulation of compressor has enhanced about 8.4%;
- » Under some load conditions, lower the operation power of compressor, which can be up to 60%.
- » The GRZ-type curve has decreased the leaked triangle area of 50%, reduced the leakage capacity of refrigerant and improved compressor performance;
- » The GRZ-type curve improves the stiffness of female rotor and decreased about 28.3% of the deformation;
- » Drive point is set in both high and low pressure side, the male and female rotor will increase/decrease speed at the same time, ensuring a stable mesh.
- » The permanent magnetic synchronous motor adopts the built-in method of V-shape magnetic steel, by taking advantage of the saliency effect of magnetic circuit, it enhances the motor torque;
- » Inverter startup, the starting current is below 10A, the impact to the overall power grid is small;
- » Under full load working condition, motor efficiency is above 95%; under rated power, compared with traditional 3-phase asynchronous motor, it has enhanced 3%, in some other loads, it has enhanced 5% ~ 7%.
- » The control circuit adopts 24V full DC electronic control component, which effectively reduces electromagnetic interference, safe and reliable;
- » Meet the wide voltage input between 328-528V, 50/60Hz is compatible.

CENTRIFUGAL CHILLER

CE Series Centrifugal Chiller

CVE Series Permanent Magnet
Synchronous Inverter Centrifugal
Chiller

CC Series Magnetic Bearing
Inverter Centrifugal Chiller

CE Series Centrifugal Chiller

R134a

A new generation of fixed-speed centrifugal chiller, with two-stage compression technology, is highly efficient, energy-saving, safe and reliable.

» Two-stage compression enthalpy-adding technology and economizer are adopted to improve efficiency by 5~6% compared with one-stage cooling circulation system. Rotation speed of compressor is reduced, operation reliability is improved and lifespan is prolonged. Meanwhile, surge margin is wide and operation range is wide.

» Variable-area diffuser is adopted to effectively improve surge margin and system operation range, and reduce noise and vibration.

» With integrated startup cabinet and wire connection in the factory, user only needs to provide power cord, so wire connection during installation is simplified and floor area of startup cabinet is reduced.

» Semi-enclosed motor and helical refrigerant ejecting cooling technology is adopted to not only reduce the risk of refrigerant and lubricant leakage, but also prevent heat dissipation in machine room, reducing the cooling device cost and operation cost.

» New heat exchanger specially designed for centrifugal chiller contributes to even distribution of refrigerant, rational temperature field and heat exchange rate improvement; meanwhile, the heat exchanger adopts high-efficiency heat exchange tube for reducing heat transfer resistance and improving the system's cooling capacity and energy efficiency ratio.

» User-friendly touch screen is adopted for convenient operation.

» High-performance digital signal processing and intelligent control technology is adopted.

» Vaned diffuser with the optimized ratio between the vane width and spacing.

Notes:

- Above model selection is applicable to the condition in which leaving chilled water temperature is 6.7 °C and entering cooling water temperature is 29.4 °C.
- CE610UN4SN4-2-G~CE621UN1SN1-2-G adopt independent dual-system structure.
- Above water flow is indicated according to ARI 550/590-2015; IPLV is the test value obtained based on the working condition specified in ARI 550/590-2015.
- Scale factors of chilled water and cooling water are 0.018 m²·°C/kW and 0.044m²·°C/kW respectively.
- For special working condition, please contact Gree's local sales agent.
- Standard unit's water side bearing pressure is 1.0MPa; 1.6MPa is an available option.
- The unit's performance parameters may be changed without prior notice due to product improvement. For the specific parameters, please refer to product nameplate.
- The product models are not for EU.

CVE Series Permanent Magnet Synchronous Inverter Centrifugal Chiller

It adopts high-efficiency DC inverter centrifugal compressor with internationally leading coefficient of performance. It provides high-efficiency and stable operation, and can be connected to all sorts of fan coil units to realize cooling for large civil and industrial buildings.

- High-efficiency and energy-saving
- Direct-driven impeller
- Permanent-magnet motor
- Airborne inverter
- 2-stage compression
- Wide operation range
- Advanced control

» As it adopts high-efficiency motor direct-driven two-stage impellers with simpler structure and more reliable operation, the size and weight of compressor is only 40% of the conventional compressor with the same cooling capacity.

» It adopts high-efficiency permanent magnet synchronous inverter motor, whose power is over 400kW and rotation speed is over 18000rp. Meanwhile, the helical refrigerant ejecting cooling technology is adopted to ensure high-efficiency operation of the motor.

» The design of impeller and diffuser is optimized for achieving high-efficiency operation of compressor in various loads.

» It adopts patented sensor control technology to control the position of motor precisely and improve the reliability.

» It adopts the unique diffuser with wide blade spacing to achieve high-efficiency recycle of pressure.

» Two-stage compression enthalpy-adding technology and economizer are adopted to improve efficiency by 5~6% compared with one-stage cooling circulation system. Rotation speed of compressor is reduced, operation reliability is improved and lifespan is prolonged. Meanwhile, surge margin and operation range are wide.

» User-friendly touch screen is adopted for convenient operation, precise control and stable output.

» Vaned diffuser with the optimized ratio between the vane width and spacing.

CC Series Magnetic Bearing Inverter Centrifugal Chiller

Gree CC series magnetic bearing inverter centrifugal chiller adopts the magnetic bearing compressor for aeronautic industry, which achieves oil-free operation of cooling system, avoids complicated lubricant system and greatly improves system's reliability. This series can be widely adopted in hotels, office buildings, etc.

- It adopts magnetic bearing to achieve oil-free operation and reduce the heat exchange influence of lubricant.
- The system adopts flooded heat exchange design and build-in subcooler in condenser.
- Impellers directly driven by the motor with gearless design, improving the reliability of the system.
- With advanced and reliable microcomputer control system, powerful group control modules and building communication interface.
- User-friendly touch screen is adopted for convenient operation, precise control and stable output.
- Multiple protection function.
- Noise of this entire unit is 10 dB(A) lower than the traditional ones.

- Above water flow is indicated according to ARI 550/590-2015; IPLV is the test value obtained based on the working condition specified in ARI 550/590-2015.
- For compressor using inverter starter, starting current < rated current; power factor is 0.995.
- The unit's performance parameters may be changed without prior notice due to product improvement. For the specific parameters, please refer to product nameplate.
- The product models are not for EU.

TERMINAL

Fan Coil Unit

Air Curtain

Fan Coil Unit

» Vertical-mounted type fan coil unit has simple look, flexible design and can be easily installed.

Inner groove copper

Washable filter

Quiet function

Multi fan speed

Compact design

» Optimize and design volute molded lines, impair the incision effect of high-speed air flow discharged from impeller, achieve good noise reduction effect; optimize and design angle of centrifugal fan blade and internal and external circle diameter of impeller, which can increase the air volume and lower the fan noise as well.

» Add noise-absorbing heat insulation material in the duct to improve the vortex and lower the noise.

» The body is small for easy installation and occupying less space, which is applicable to multiple installing locations.

» User can freely select fan coil temperature controller, which can be flexibly installed.

» Unique electric box sub-assy structure design: motor and capacitor are separated, external capacitor for easy maintenance and replacement; the capacitor is plug-in type for easily removing and maintaining.

Fan Coil Unit

Concealed Ceiling Type

It is a kind of fan coil unit that is connected to the chillers to realize cooling/heating for civil or residential use.

(without circle bellows)

(with circle bellows)

Inner groove copper

Washable filter

Quiet function

Multi fan speed

Compact design

» Thanks to optimized air flue design that greatly improve the fan efficiency and lower the operation noise.

» Flexible air inlet/outlet directions, meet different installation requirements.

» Washable filter is optional when equipped with air return box.

Note: This parameter is obtained based on the test standard of Eurovent and under OPa static pressure with circle bellows & filter.

Fan Coil Unit

Cassette Type

- » Thanks to optimized air flue design that greatly improve the fan efficiency and lower the operation noise.
- » Four directions airflow that makes an even temperature and humidity distribution.
- » Evaporator moisture auto cleaning after power off to avoid mildew.
- » Forced high speed fan operation under emergency condition.

Air Curtain

The air curtain adopts cross flow blower to generate high speed air flow downward, that be installed upward side of the entrance door or window, to isolate the indoor air from the outdoor air and reduce the loss of indoor cool air, also prevent the insects and dust from entering the indoor environment.

Washable filter

Quiet function

Compact design

Easier maintainability

- 》 Optimized cross-flow fan and good performance motor are adopted.
- 》 Micro processor controlling with high reliability and long service life.
- 》 Anti-corrosion thanks to two-side painted electro-galvanized metal case.
- 》 High quality galvanized steel casing with double-sided plastic spray processing, high anti-corrosion.
- 》 Good strength structure provides powerful airflow.
- 》 Integrated electric components, easy maintenance.
- 》 High performance cross flow fan blade with 3D-optimized streamlined.

Item	Working condition parameters

	Optoelectronic isolated signal multiplier	RS-422/485			○	○

Notes:

● means standard, ○ means optional.

*1 The pictures of unit and wireless remote controller please refer to the actual product.

*2 If long-distance monitoring software Gree Eudemon 2009 is selected, the communication module ME30-17/E2(M) shall be selected also. The selection shall refer to actual models.

*3 DQ34 including wired remote controller Z4E351B and Communication module ZJ0212, so if DQ34 is selected, the wired remote controller Z54352A1 is not necessary to select. ME30-17/E2(M) is not necessary also.

SPECIALIZED AC

Marine Air Conditioner

Marine Air Conditioner

It is a kind of sea water source AC that is widely used in yachts and boats.

- » 360 degree air blowing.
- » Outlay electric box for easy installation & maintenance.
- » Low start-up current thanks to power delay control design.
- » LED display of operation status.
- » Highly anti-corrosion special spray processing on the complete unit.
- » Nickel-Copper coaxial heat exchanger for sea water side.
- » Golden anti-corrosive finned tube heat exchanger.
- » Only one PCB for the entire control and minimize cable connections, with higher reliability and also easier maintenance.
- » Universal for both 50Hz and 60Hz.

Fan motor supply air outlet diameter		inch(mm)	4.7(119.4)	4.7(119.4)	4.7(119.4)	4.7(119.4)	

Notes:

*: Test condition for cooling: temperature of dry/wet bulb at air inlet: 27/19.5 °C; water inlet/outlet temperature: 32/36 °C; static pressure: 20Pa;

Test condition for heating: temperature of dry/wet bulb at air inlet: 22/- °C; water inlet temperature: 15 °C; water flow is same as that for cooling; static pressure: 20Pa.

** : Test condition for heating: temperature of dry/wet bulb at air inlet: 27/19.5 °C; water inlet/outlet temperature: 30/35 °C; static pressure: 0Pa;

Test condition for heating: temperature of dry/wet bulb at air inlet: 20/15 °C; water inlet temperature: 15 °C; water flow is same as that for cooling; static pressure: 0Pa.

Reference Projects Lineup

Country	Project Name	Installed Series
Philippine	Tosot Philippines Corporation	GMV5 PV
Iran	Tehran University	PV Inverter Centrifugal Chiller
Macedonia	Nikob Cash Center Skopje	GMV5 PV
Thailand	7-11 Store	GMV5 PV
Italy	Expo 2015	GMV4; GMV5
Brazil	2016 Rio de Janeiro Olympics Games	GMV4; GMV4 Mini; Free Match; Splits
Bulgaria	G. Asparuhov Stadium	GMV 4; Cassette IDU
Russia	Mordovia Arena	Water-cooled Screw Chiller; Fan Coils
Malawi	National Stadium	GMV5 Duct System
South Africa	2010 South Africa FIFA World Cup	Water-cooled Packaged Unit
Angola	2010 Africa Cup of Nations	Digital D4 (Modular Digital VRF); Duct Split Unit
Russia	Sochi More-Mall	Centrifugal Chiller
India	Bicon Headquarter Building	Water-cooled Screw Chiller; Air-cooled Screw Chiller
France	Trattoria Restaurant	U-Match; Duct
UK	Wyndham Leisure Centre	GMV5 Heat Recovery
UK	Sketch	GMV5; U-match Split Systems
Russia	Mir Kino Cinema	Duct
Myanmar	Grand Hantha International Hospital	Inverter Centrifugal Chiller; AHU; Fan Coil
Sudan	Ministry of Finance	GMV5
Cuba	CECMED National Pharmacy Laboratory	Water-cooled Screw Chiller; Hydronic Air Handling Unit; Fan Coil Unit
Malta	ST James Hospital	Air-cooled Scroll Chiller (C Series); Mini Chiller
Bulgaria	Sliven Town Library	Air-cooled Scroll Chiller
Senegal	Grande Mosquee De Touba	Water-cooled Package Unit
Brazil	Farroupilha Porto Alegre School	GMV4
UK	Richmond upon Thames College	GMV5
Russia	Uralzheldorproekt Institute	GMV
Sudan	National University Sudan	GMV4 DC Inverter
Serbia	Student Dormitory in Novi Sad	Modular Air-cooled Screw Chiller
Panama	Panama De Universidad Technology	DC Inverter GMV
Bahrain	IBN School	Rooftop Package Unit
Cyprus	Lancashire University	DC Inverter GMV
UK	Persimmon Homes HQ	GMV5 Heat Recovery
Russia	AVM-Orsetto Business Center	GMV
Indonesia	Oppo and J & T Office Tower-Landmark Puit	GMV5 Duct System; GMV5 Fresh Air System; AC Elevator; Air Curtain
Indonesia	Satoria Tower	GMV5; GMV5 Duct Type; Split Wall Mounted
Oman	Al Habsi	GMV5
Oman	Raha Towers	GMV5 Compact
Bahrain	Millennium Tower	Fan Coil Unit
Oman	Trading Building	Air Cooled Screw Chiller
Costarica	Ins Call Center	DC Inverter GMV
Russia	Green Park Commercial Center	DC Inverter GMV
Croatia	FINA Rijeka	Air-cooled Scroll Chiller (C Series)
Lebanon	CUBIC Commercial Center	GMV5
Palestine	Ministry of Foreign Affairs	DC Inverter GMV
Pakistan	Al Tijara Building	DC Inverter GMV
Serbia	Buha	Versati
Indonesia	Sudirman Suites	Centrifugal Chiller; Concealed Ceiling Type; AHU; Duct Type; Wall Mounted Unit
Sri Lanka	Astoria	GMV5; Duct Type
Myanmar	Golden City	GMV5; Duct Type
Australia	Subi Strand	GMV5 Mini
Australia	Toccatà	GMV5 Mini
Australia	Linq	GMV5 Mini
Australia	Unison	GMV5
Oman	ERA Real Estate	GMV5
Iraq	NawRoz City-500 Luxury Apartment	Super Free Match

Country	Project Name	Installed Series
Iraq	Lebanese Village	DC Inverter GMV; U-Match; Super Free Match; Air Cooled Screw Chiller
Iraq	New Eskan Project	Super Free Match
Bulgaria	Private House, Markovo Village	Mini Chiller
Lebanon	Conad Supermarket	U-match (Inverter Series)
America	Charter Court Apartments	TMV5
Russia	Mechta Shopping Mall	U-Match
Russia	Krasnaya Pakhra Recreation Center	GMV
Philippine	Unitop Tagegarao	Water-cooled Screw Chiller
Philippine	One Mall	Centrifugal Chiller; Water-cooled Screw Chiller; AHU
Myanmar	Time City	DC Inverter Centrifugal Chiller
Mauritius	Grand Bay La Croisette	GMV4
Angola	Ulenko Center Glakeni	GMV5
Oman	Centrepoint Mall	GMV5 Compact
Oman	Nawaras Commercial Centre	High-efficiency Air-cooled Screw Chiller; Terminal; GMV5; Rooftop
Russia	Tools Shop	U-Match
India	Tanishq Flag Store	DC Inverter GMV
Palestine	Palestinian Trade Tower	DC Inverter GMV
Indonesia	Grand Mercure & Ibis Hotel Yogyakarta	High-efficiency Modular Air-cooled Screw Chiller
Philippine	Sunlight Hotel Coron	GMV5
Philippine	Sunshine Island Hotel	GMV5; Duct Type
Thailand	Harbour View Residence Hotel	GMV5
Mauritius	Heritage Le Telfair Hotel	GMV5 Duct System
Qatar	Hilton Garden Inn	Fan Coil Unit
Yemen	Al-Bustan	DC Inverter GMV
Cyprus	Limassol Hotel	Free Match
Bulgaria	Alen Mak Hotel	Air-cooled Scroll Chiller
Bulgaria	Sana 1 Hotel	DC Inverter GMV
Greece	Samos Bay Hotel	DC Inverter GMV
Indonesia	Ibis Budget Hotell	Heat pump Water Heater; Split Wall Mounted; U-Match Split Duct
Brazil	Compal Factory	Modular Air-cooled Scroll Chiller
Russia	MLP-Podolsk Logistic Center	GMV
Russia	IEK Warehouse	GMV
China	Top Giga Material TGHQ	CVE Series Permanent Magnet Synchronous Inverter Centrifugal Chiller
Brazil	XCMG Brasil	DC Inverter GMV
Russia	Aircraft Plant	U-Match
